

# International Symposium on Networks-on-Chip

## Call for Papers

16<sup>th</sup> IEEE/ACM International Symposium on Networks-on-Chip  
October 7-14, 2022, **Hybrid** Conference (Shanghai, China)

(Co-located with Embedded Systems Week 2022)

<https://nocs2022.github.io/>

The International Symposium on Networks-on-Chip (NOCS) is the premier event dedicated to interdisciplinary research on on-chip, package-scale, chip-to-chip, and datacenter rack-scale communication technology, architecture, design methods, applications and systems. NOCS brings together scientists and engineers working on NoC innovations and applications from inter-related research communities, including discrete optimization and algorithms, computer architecture, networking, circuits and systems, packaging, embedded systems, and design automation.

**New in NOCS'22—Journal-Integrated Publication Model:** All accepted papers will be published in an IEEE Design & Test Special Issue.

Please visit <https://nocs2022.github.io/> for more information.

### Topics of interest include, but are not limited to:

#### NoC Architecture and Implementation

- Network architecture (topology, routing, arbitration)
- Timing, synchronous/asynchronous communication
- NoC reliability issues and solutions
- Security issues and solutions in NoC architectures
- Power/thermal issues at NoC un-core and system-level
- Network interface issues and solutions
- Signaling and circuit design for NoC links and routers

#### Communication Analysis, Optimization, and Verification

- NoC performance analysis and Quality of Service
- Modeling, simulation, and synthesis of NoC
- Verification, debug and test of NoC
- NoC design and simulation methodologies and tools
- Benchmarks, experiences on NoC-based hardware
- Communication-efficient algorithms
- Communication workload characterization & evaluation

#### Emerging and Novel NoC Technologies

- Optical, wireless, CNT, and other emerging technologies
- NoC for 2.5D and 3D packages
- Package-specific NoC design
- Network coding and compression solutions
- Approximate computing for NoC and NoC-based systems

#### NoC for High-Performance Computing (HPC) Systems

- NoC design for Deep Learning
- Mapping of emerging applications and systems onto NoC
- NoC case studies, application-specific NoC design
- NoC for FPGA, structured ASIC, CMP and MPSoC
- NoC designs for heterogeneous systems
- NoC for CPU-GPU and data-center-on-a-chip (DCoC)
- Scalable modeling of NoC
- Machine learning for NoC and NoC-based Systems

#### NoC at the Un-Core and System-level

- Design of memory subsystem (un-core) including memory controllers, caches, cache coherence protocols in NoC
- NoC for new memory/storage technologies
- NoC support for processing-in-memory
- OS support for NoC
- Programming models for NoCs
- Interactions between large-scale systems (datacenter, edge and fog computing) and NoC-based building blocks

#### Inter/Intra-Chip and Rack-Scale Network

- Unified inter/intra-chip networks
- Hybrid chip-scale and datacenter rack-scale networks
- All aspects of inter-chip and rack-scale network design

### Organization Committee

#### General Chairs

Sergi Abadal (Universitat Politècnica de Catalunya)  
Joshua San Miguel (University of Wisconsin)

#### Technical Program Chairs

Miquel Moreto (Barcelona Supercomputing Center)  
Mahdi Nikdast (Colorado State University)

#### Steering Committee Chair

Radu Marculescu (University of Texas, Austin)

#### Special Sessions Chair

Masoumeh (Azin) Ebrahimi (KTH Royal Institute of Technology)

#### Publicity Chairs

Jieming Yin (Lehigh University)  
Poona Bahrebar (Ghent University)  
Trevor Carlson (National University of Singapore)

#### Web Chair

Salvatore Monteleone (Niccolò Cusano University)

### Important Dates (EXTENDED)

**Abstract Registration:** May 13, 2022

**Full-paper Submission:** May 20, 2022

**First Notification and Reviews:** July 8, 2022

**Submission of Revised Papers:** July 29, 2022

**Final Notification of Acceptance:** August 19, 2022
